

## Tunisia: managing the bodies of people who have died or disappeared during migration

There are significant differences between regions.  
Practices are more structured in urban areas.  
However, there are no national standards in Tunisia.

### Body recovery

Occasional at sea  
(at the discretion of the investigators)

Systematic on land

### Body identification

Systematic identification procedures for nationals

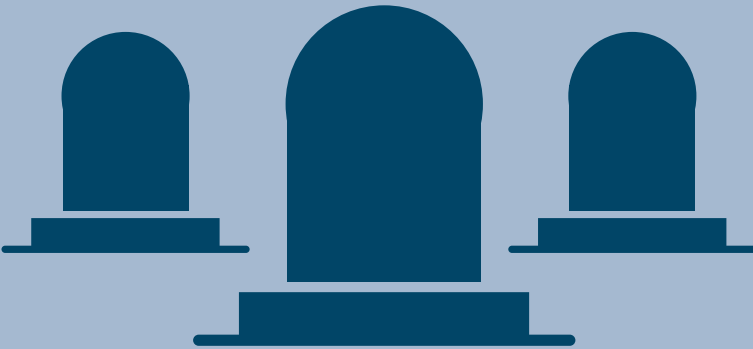

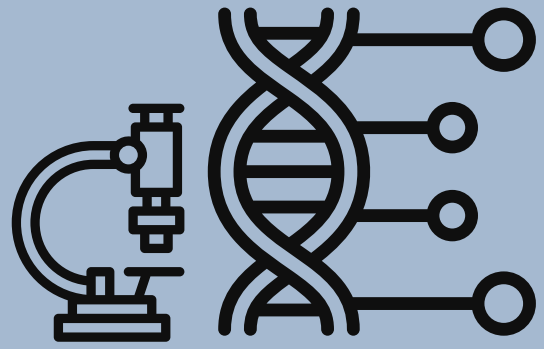

Occasional identification procedures for foreigners

## Data collection

Systematic DNA collection

Systematic autopsies

Systematic collection and archiving of post-mortem data

## Burials

Systematic individual burials

Occasional tracing and localisation

Are conditioned to familial request :

- the issue of death certificates
- body repatriation (for a foreign migrant)

## Body search systems

For nationals: frequent

For foreigners: occasional
